

**Ms. Juanita Smith
President of Smith and Smith Consultants**

“Why Move Forward in All Directions?”

Ms. Smith talked about how we move in different directions
yet work towards a common goal.

She did a group exercise having participants stand in a circle holding hands facing inward.

Facing inward people don't see the whole picture and it makes for a smaller team.

She then had the group face outward indicating you are always surveying when looking out.

“No person can spin a wheel alone.”

She stated that change gives purpose and direction, and that we must trust the system to work.

**There are lots of ways to form a team “but you have to be able to connect; you have to have
a pulse.”**
